BDLT PDF Presenter

How to present, annotate and save

Blockchain & DLT Research Group, UZH

Guide to version 1.6.0

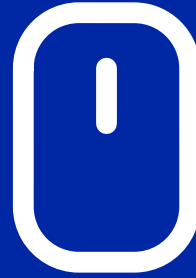

Three ways to use it

With a pencil

The pencil draws and fingers navigate. Pencil mode starts at the first touch of the pencil.

With a mouse

Click to turn pages, pick a tool to draw, and press Esc to go back to Navigate.

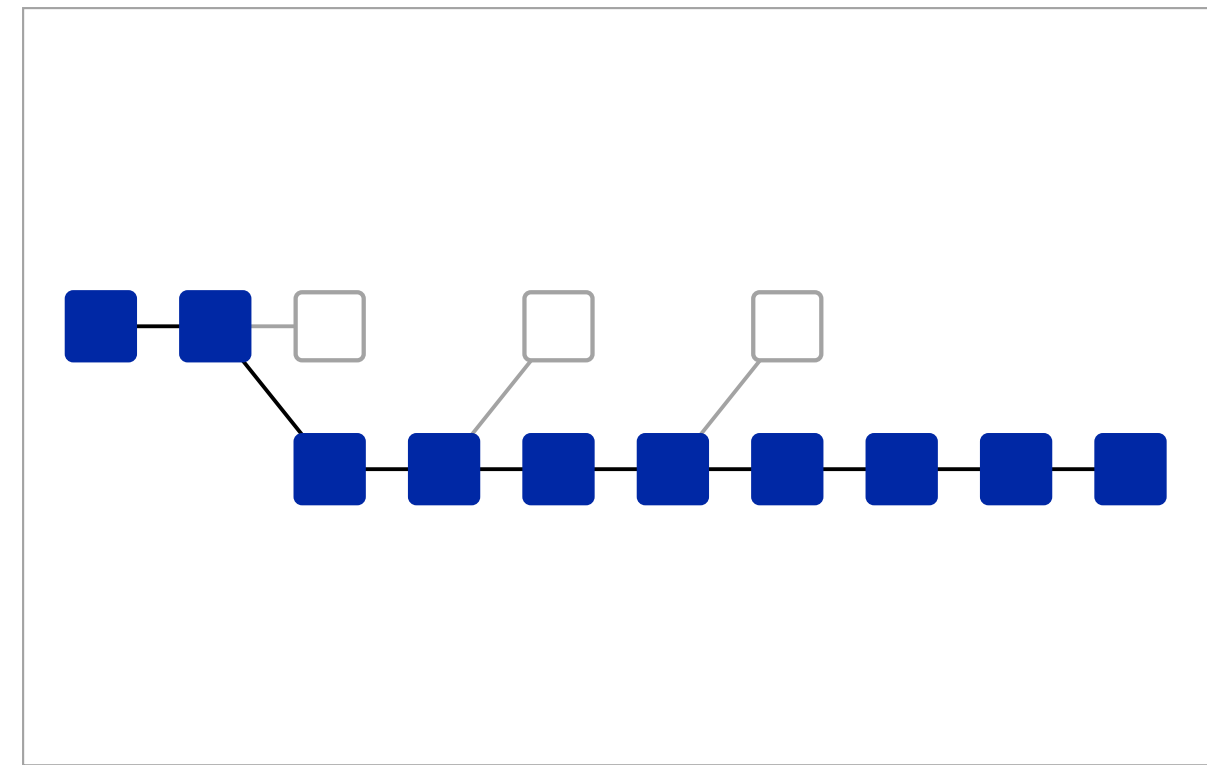

With a finger

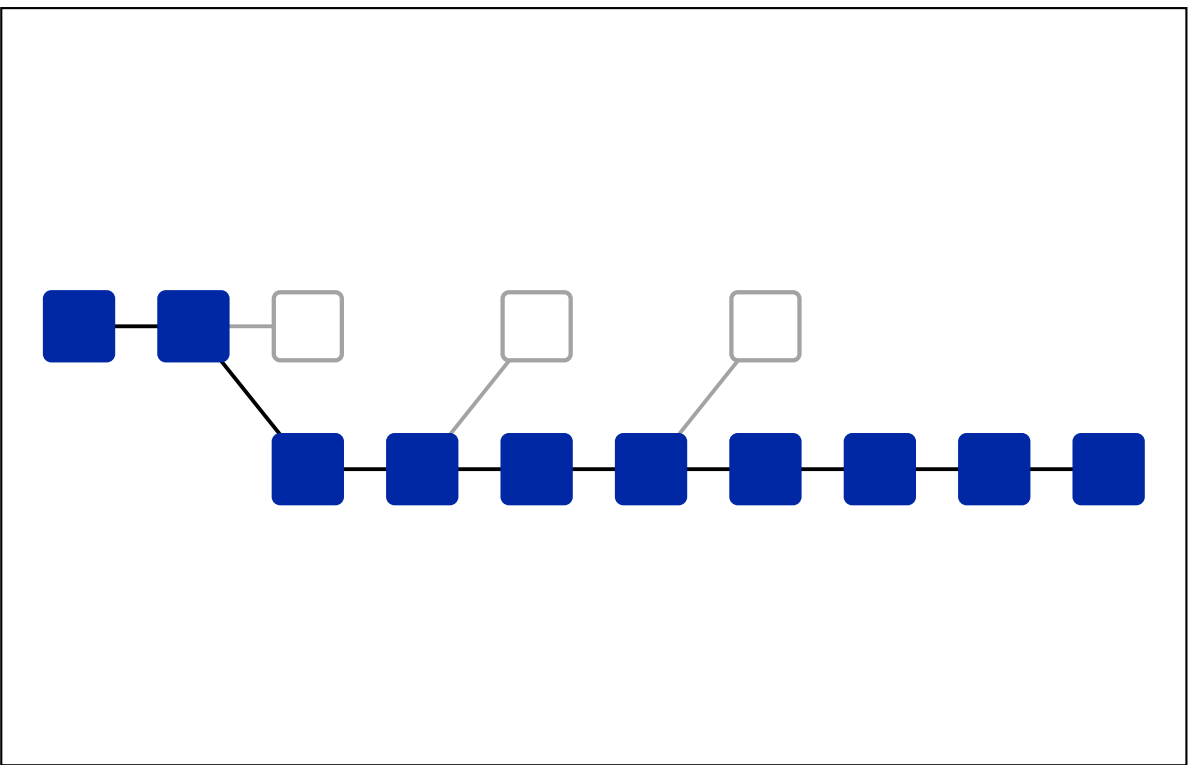

A finger works like the mouse, and two fingers always zoom.

A slide that runs

Any other PDF viewer a picture

BDLT PDF Presenter and Viewer the figure runs

⏮

⏭

>

block 12 / 12

orphaned 3

A new block extends the chain.

■ longest chain

□ orphaned

Left: what every PDF viewer shows. Right: the same figure, run by BDLT PDF Presenter. If pressing play changes nothing, you are reading this PDF somewhere else.

The four tap zones of a slide: try them here

Tap here
Previous slide

Tap here
Toolbar on or off

slide 1 / 5

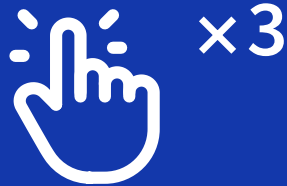

toolbar off

overview closed

Tap a zone.

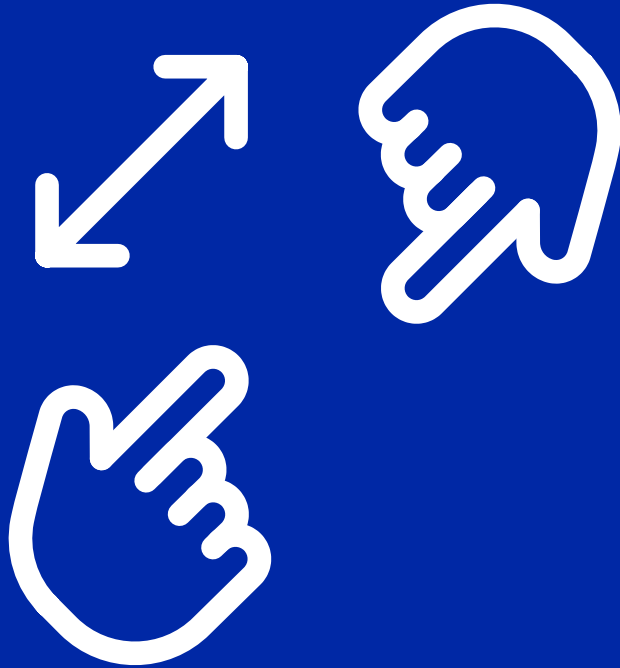

Tap here
Next slide

Triple-tap here

Opens the strip of slides; tap one to jump to it

Pinch to zoom

Pinch with two fingers to zoom

Drag with one finger to move around while zoomed in.

Double-tap to fit the whole slide again.

The Pencil keeps writing while you are zoomed in.

Tools: navigate, select, write, point, erase

Navigate

Tap or click to turn pages (Esc returns here).

Select

Drag to copy words, or an area as a picture.

Pen

Pressure-sensitive ink. Tap again for the colours.

Highlighter

Transparent marks. Tap again for the colours.

Laser pointer

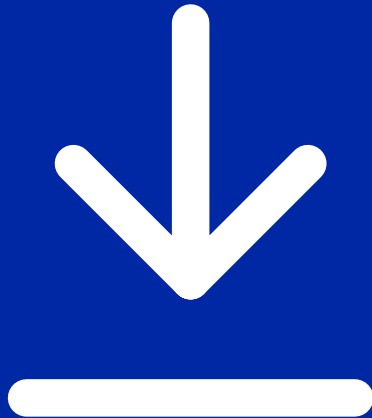

Points without marking. Tap again for the colour.

Eraser

Touch a stroke to remove it.

Save keeps your notes

Save writes your ink into a new PDF

It works on every device: the new PDF is downloaded, or your device asks where to keep it.

Try it: circle something on this slide, then press Save.

Select: copy words or an area, and paste them anywhere

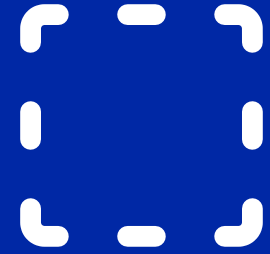

1. Choose Select

The button next to Navigate, or the S key. It works with the mouse; Esc goes back to Navigate.

2. Copy words

Drag over the words of a slide, then copy and paste them as text, as in any document.

3. Copy a picture

Drag next to the words, or hold Alt anywhere: that area is copied as a picture, with your ink. Paste it anywhere.

The toolbar, button by button

Open

Load a PDF from this device (Ctrl/⌘ O).

Reload

Reads the PDF again; the ink stays (Ctrl/⌘ R).

First / last slide

Also at both ends of the slide overview.

Previous / next

Same as tapping the left or right third.

Slide overview

Same as the lower-quarter triple-tap.

Undo

Takes back the last change (Ctrl/⌘ Z).

Clear

Removes all ink on this slide.

Save

Writes your ink into a new PDF (Ctrl/⌘ S).

Full screen

Hides the browser bars where allowed.

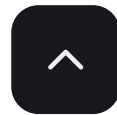

Same or separate views

One mirrored screen, or projector and lecturer.

Settings

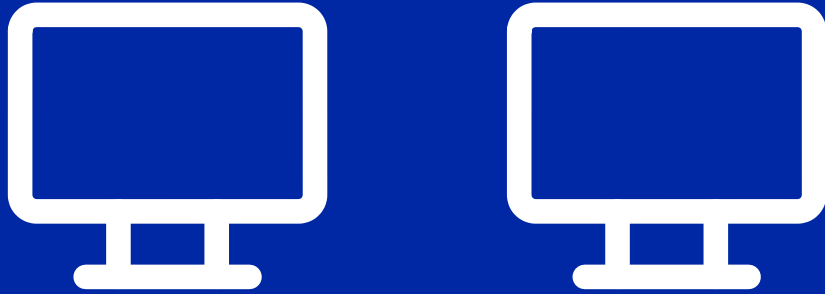

Colours, slide strip speed and glide, About.

Hide toolbar

Tap the top centre of the slide to bring it back.

Present with the same view, or with separate views

Same view

Mirror your screen to the projector: everyone sees what you see. Tap the top centre to hide the toolbar.

Separate views

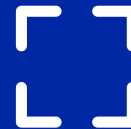

1. Two-screens button

Tap it in the toolbar. It says so if your device cannot open a second window.

2. Projector window

Open it as a window of its own and move it to the projector's display.

3. Fill the screen

Tap the projector window. Your own screen then shows the clock and the slide strip.

Open your own PDF from the toolbar to begin
