BDLT PDF Presenter

How to present, annotate and save

Blockchain & DLT Research Group, UZH

Guide

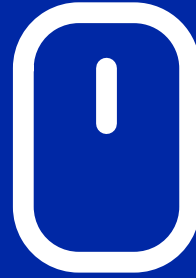

Three ways to use it

iPad with Apple Pencil

The Pencil draws and fingers navigate. Pencil mode starts at the first touch of the Pencil.

Computer with a mouse

Click to turn pages, pick a tool to draw, and press Esc to go back to Navigate.

Phone or tablet

A finger works like the mouse, and two fingers always zoom.

Tap the right third: next slide

Tap here

Next slide

Tap the left third: previous slide

Tap here

Previous slide

Tap the top centre: show or hide the toolbar

Tap here

Toolbar on or off

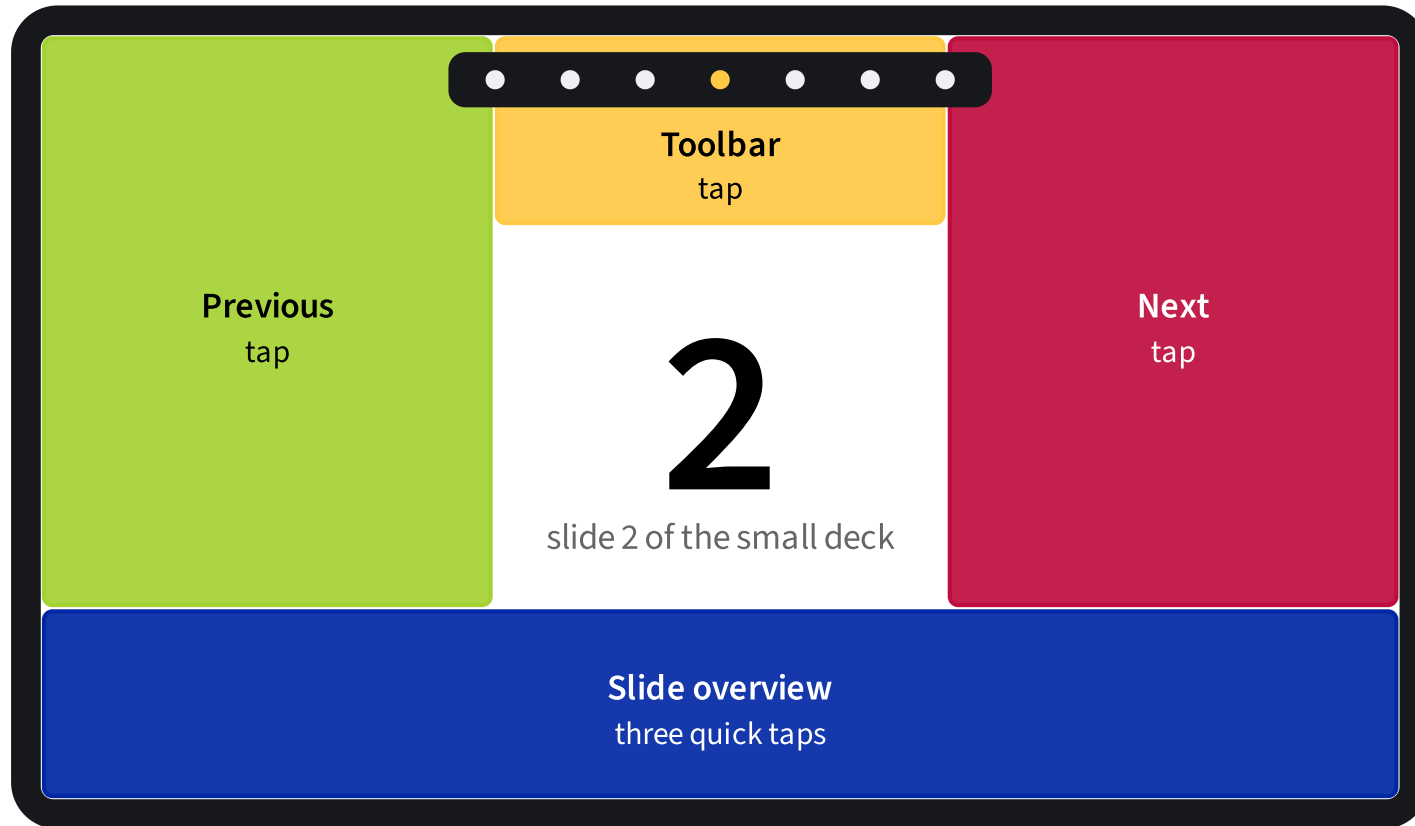

Triple-tap the lower quarter: slide overview

Triple-tap here

Opens the strip of slides; tap one to jump to it

Try the gestures

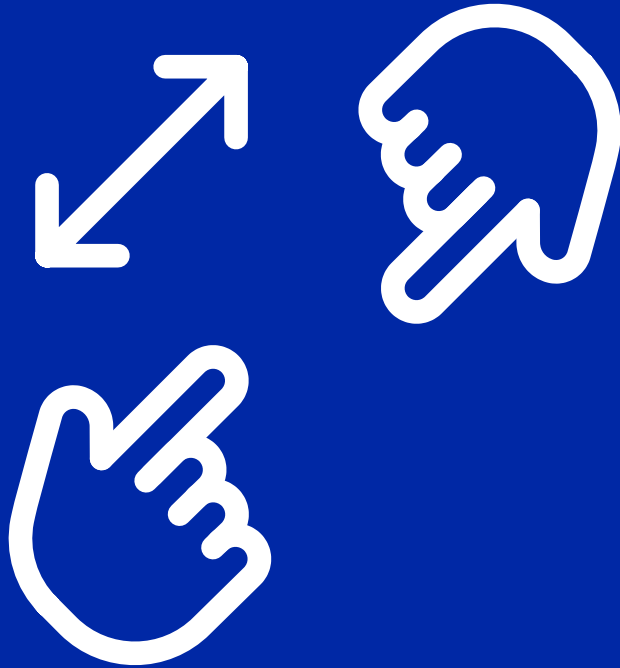

- Left third**
one tap: the previous slide
- Right third**
one tap: the next slide
- Top centre**
one tap: the toolbar, on or off
- Lower quarter**
three quick taps: the slide overview

The middle does nothing, so a stray touch is harmless.

◀ slide 2 / 5 toolbar on overview closed Tap a zone of the small screen.

Tap the zones of the small screen, with a finger or the mouse: it answers like the presenter, and each zone lights up. In any other PDF viewer this is a picture.

Pinch to zoom

Pinch with two fingers to zoom

Drag with one finger to move around while zoomed in.

Double-tap to fit the whole slide again.

The Pencil keeps writing while you are zoomed in.

Tools: navigate, write, point, erase

Navigate

Tap or click to turn pages (Esc returns here).

Pen

Pressure-sensitive ink. Tap again for the colours.

Highlighter

Transparent marks. Tap again for the colours.

Laser pointer

Points without marking. Tap again for the colour.

Eraser

Touch a stroke to remove it.

The toolbar, button by button

Open

Load a PDF from Files or iCloud Drive (⌘ O).

Reload

Reads the PDF again; slide and ink stay (⌘ R).

First / last slide

Also at both ends of the slide overview.

Previous / next

Same as tapping the left or right third.

Slide overview

Same as the lower-quarter triple-tap.

Undo

Takes back the last change on this slide (⌘ Z).

Clear

Removes all ink on this slide.

Save

Writes your ink into a new PDF (⌘ S).

Full screen

Hides the browser bars where allowed.

Same or separate views

One mirrored screen, or projector and lecturer.

Settings

Colours, slide strip speed and glide, About.

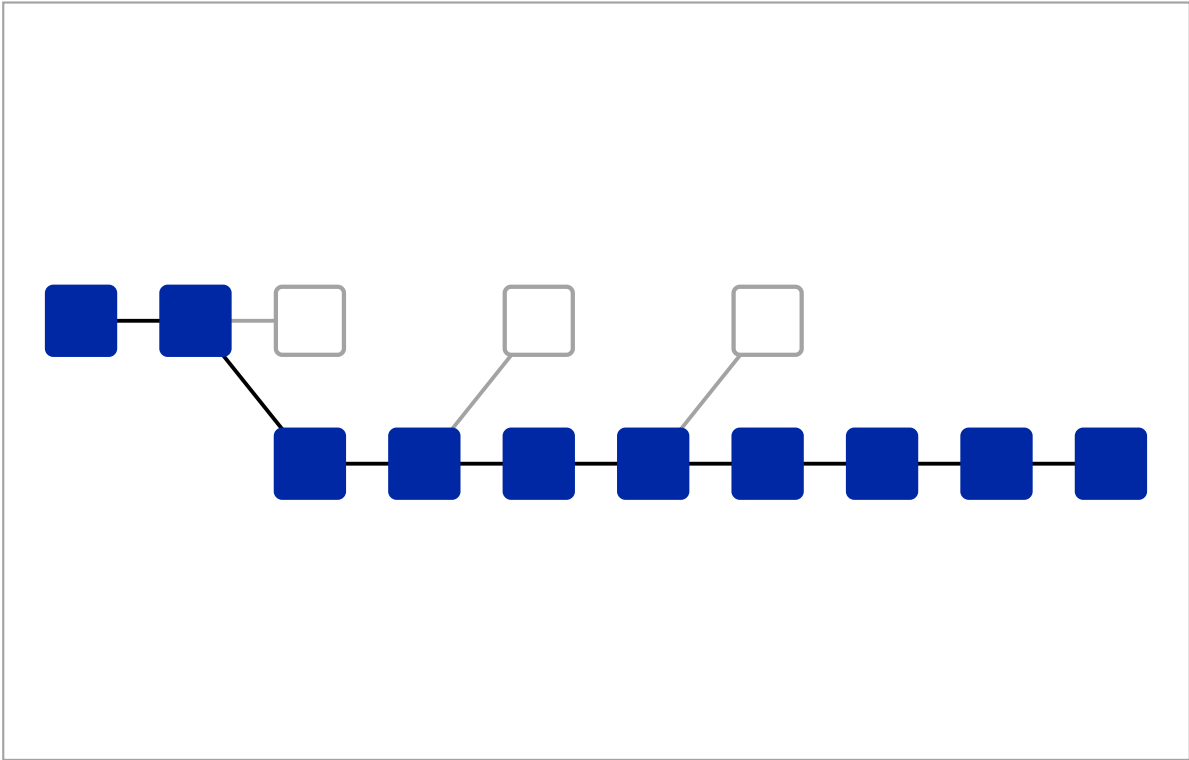

Hide toolbar

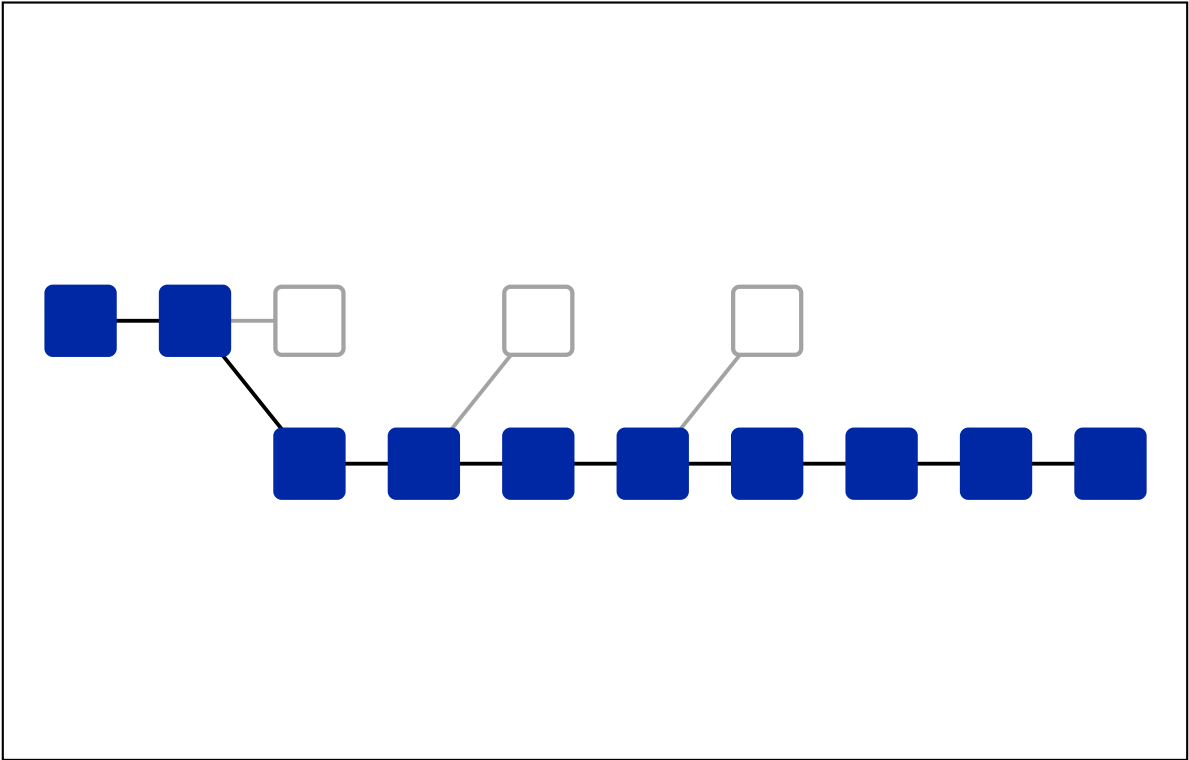

Tap the top centre of the slide to bring it back.

A slide that runs

Any other PDF viewer a picture

BDLT PDF Presenter and Viewer the figure runs

⏮

▶

>

block 12 / 12

orphaned 3

A new block extends the chain.

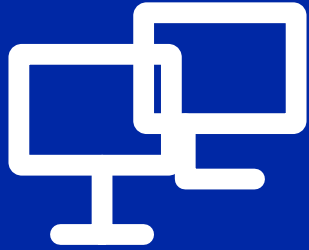

■ longest chain

□ orphaned

Left: what every PDF viewer shows. Right: the same figure, run by BDLT PDF Presenter. If pressing play changes nothing, you are reading this PDF somewhere else.

**Same view: mirror the iPad, then tap
the top centre to hide the toolbar**

Separate views: projector and lecturer

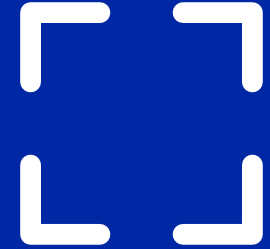

1. Two-screens button

Tap it in the toolbar, in Safari.
An iPad needs an M1 chip or later.

2. Projector window

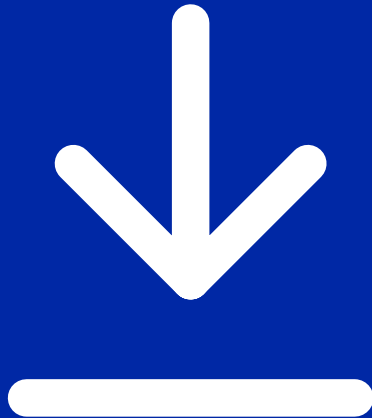

Touch and hold Projector window, choose Open in New Window, and drag it to the display.

3. Fill the screen

Tap the projector window. This iPad then shows the clock and the slide strip.

Save keeps your notes

Save writes your ink into a new PDF

On iPad, choose Save to Files and pick a folder.
Try it: circle something on this slide, then tap Save.

Open your own PDF from the toolbar to begin
